CD Sheet Music™

Technical Update

Updated Technical Information

— CDSM has been tested to perform on PC Operating systems Windows 2000 and ME.

— Users of Mac System 7 variations (particularly system 7.6.1) may experience difficulty with the Table of Contents (TOC) defaulting to a full page view, therefore eliminating further view in the "Bookmarks and Page" mode. If this happens, go to the Acrobat Reader Menu Item "Window", select "Show Bookmarks", and the user will be returned to the TOC in correct proportion. The Full page default may also occur with Mac OS 7.6.1 owners when a music file is selected from the TOC. If so, repeat the same process, and you will correctly return to the TOC. It is not necessary to close the program and reaccess the material, although this is another solution to this situation.

— This CD uses Install Version 2.09.
